

Stride™ Industrial Ethernet Switches

9-Port Ethernet Switch with Fiber Port - Plastic Case

STRIDE SlimLine Industrial Unmanaged Ethernet Switch, plastic case, -10 to +60 °C operating temperature range, eight 10/100BaseT RJ45 Ethernet ports and one multimode 100BaseFX ST or SC fiber port. Redundant power inputs with surge and spike protection, auto-crossover, DIN rail mounting. Supports Store and Forward wire speed switching and full-duplex with flow control. UL (cUL) listed and CE certified.

ACT/LNK/Speed LED

This is a bi-color (**green/yellow**) LED on models with one LED per RJ45 port.

ON Solid (not flashing)	Indicates that there is a proper Ethernet connection (Link) between the port and another Ethernet device, but no communications activity is detected.
Flashing	Indicates that there is a proper Ethernet connection (Link) between the port and another Ethernet device, and that there is communications activity.
Green	A 100 Mbps (100BaseT) connection is detected.
Yellow	A 10 Mbps (10BaseT) connection is detected.
OFF	Indicates that there is not a proper Ethernet connection (Link) between the port and another Ethernet device. Make sure the cable has been plugged securely into the ports at both ends.

Fiber LED

This is the **Green** LED on the fiber optic models.

ON (green) (not flashing)	Indicates that there is a proper fiber connection (Link) between the port and another fiber device, but no communications activity is detected.
ON (green) (flashing)	Indicates that there is a proper fiber connection (Link) between the port and another fiber device, and that there is communications activity.
OFF	Indicates that there is not a proper fiber connection (Link) between the port and another fiber device. Make sure the fiber optic cable has been plugged securely into the ports at both ends.

Specifications

The following are specifications relevant to the SE-SW9U-ST and SE-SW9U-SC 9-Port Ethernet Switches with Fiber Port.

Input power (typical with all ports active at 100 Mbps)	5.0 W

Stride™ Industrial Ethernet Switches & Media Converters

Installation

DIN Rail Mounting: Plastic Case

DIN rail mounting steps:

1. Hook top back of unit over the DIN rail.
2. Push bottom back onto the DIN rail until it snaps into place.

DIN rail removal steps:

- A. Insert screwdriver into DIN clip and pry until it releases from the DIN rail.
- B. Unhook top of unit from DIN rail.

DIN Rail Mounting: Metal Case

DIN rail mounting steps:

1. Hook top back of unit over the DIN rail.
2. Push bottom back onto the DIN rail until it snaps into place.

DIN rail removal steps:

- A. Push the unit down to free the bottom of the DIN rail.
- B. Rotate the bottom of the unit away from the DIN rail.
- C. Unhook top of unit from DIN rail.

Optional Mounting

Vertical screw to panel mount.

For better shock and vibration resistance
(Metal cased models only)

Flat screw to panel mount.

For a low profile orientation in shallow boxes plus the best shock and vibration resistance.

Power wiring

Single DC Power

Redundant DC Power

Maximum power terminal screw torque is **5.0 lb-in (0.57Nm)**.

Wire Size Range **24 - 12 AWG**

10-30 VDC

A recommended DC power supply is AutomationDirect.com Part number **PSC-24-015**.

The power connection terminal block is removable for access to the mounting tab.

Industrial Strength Ethernet

Stride is our line of industrial grade unmanaged Ethernet switches and media converters. Designed with our PLC, HMI and drive customers in mind, Stride Ethernet switches are specifically built for industrial environments. With a Stride industrial Ethernet switch on an isolated control LAN, you can reduce data collisions that slow down your network. Stride Ethernet switches automatically determine and remember the devices connected to each port and route messages only through the appropriate ports. Install Stride switches and your Ethernet control network will maintain more consistent cycle times even under heavy I/O and data exchange.

Extreme Temperatures

For industrial applications where temperatures can change from freezing to sweltering heat, the Stride line offers metal housing models (-WT) that are designed for the most extreme environments, ranging from -40 to +85°C. The metal housing versions also allow you to choose various mounting methods for your application. This is standard and no kits are required!

Fiber Optic Support

Stride offers models that support ST type Multimode Fiber Optic connections. Fiber optic cables are immune to electrical and magnetic interference. Fiber optics cannot be damaged by induced voltage transients. Fiber optic cabling not only enhances reliability, it saves time you might have spent tracking down those nasty communications problems caused by electrical interference. Also, your network distance is greatly increased when using Fiber optic cabling.

Features

Advanced Hardware

- All 10/100 RJ45 ports are auto-detecting, auto-crossover and auto-polarity
- Redundant power inputs with industrial surge and spike protection
- Optional 100Mbps multimode fiber optic port for distances up to 4km

Real-time Performance

- Store and forward wire speed switching - no delays
- Full-duplex operation with flow control (no collisions!)
- Auto crossover (MDI/MDIX) and auto polarity

True Industrial Design

- Ethernet Isolation -1500 VRMS 1 minute
- Spike protection - 5,000 watts (10x for 10 uS)
- UL, (cUL) listed and CE certified
- Hazardous locations rated for Class 1, Div. 2

Simple Installation

With no user setup required, the Stride switches and media converters will immediately start operating as soon as you power them up and connect them to the network.

Deterministic Control

The Stride switches automatically determine and remember where each Ethernet device is located and route messages only through the appropriate port. This gives devices on the network an open communications channels and helps minimize network loading. Another benefit is the 10/100 auto-speed selection that enhances the performance of 10 Mbps Ethernet devices by speeding up their message transmissions to 100 Mbps when they are passed to a faster Ethernet backbone.

Increased Reliability

The Stride Ethernet switches have been designed for the industrial environment. They will survive extreme temperatures, as well as dirty, unreliable industrial power. Meeting UL 1604 (Class I Div. 2), and the IEC68-2 standard for vibration resilience, the Stride switches will provide years of reliable performance in applications too tough for commercial grade switches.

Mounting Options: The (-WT) metal housing version allows for various mounting options.

Power LED to indicate power on P1 or P2 power inputs

Fiber Optic Port on selected models. Multimode fiber optic port with ST type connector that supports half and full duplex with a maximum distance of 4km.

Activity, Link and Speed LED's are integrated into the RJ45 ports

RJ45 Ports that are fully IEEE 802.3 compliant with 10/100 auto-detecting for speed and duplex (full or half). Auto crossover (MDI/MDIX) automatically supports either straight or crossed cables which greatly reduces cable installation errors.

True Rugged Design:
>1,000,000 hour MTBF (mean time between failure) with both Plastic and Metal housing models

Redundant Power Inputs
 Dual power inputs with industrial surge and spike protection to help reduce down time when there is primary power loss. Reverse power protection is also supported.

Fiber LED to indicate a proper connection for the ST connectors and network activity

DIN Rail Mount:
 Snaps to standard 35 mm x 7.5 mm height DIN rail (EN50022)

Industrial Temperature Ranges
 Plastic Models:
 -10 to +60 °C (+14 to +140 °F) operating range temperatures
 Metal Models (-WT):
 -40 to +85 °C (-40 to +185 °F) operating range temperatures. 5 to 95% RH humidity range (non-condensing)

Agency Approvals:
 UL1604, CSA C22.2/213 (Class I, Div.2)
 EN50021/EN60079-15
